

BVE-WS 200 TO 500

Single heat exchanger

The BVE-WS series tanks are mainly used for the composition of a ISWH's set. The solar pump and the expansion tank are mounted directly on the storage tank in the factory. All that remains to be done is to connect the collectors, hot and cold water to the storage tank, which makes installation easier. The tank and heat exchanger are made of enamelled steel. These tanks are to be placed on the ground.
